WisdomTree Physical Solana

WisdomTree Physical Solana ETP (exchange-traded product) provides investors with a simple, secure and cost-efficient way to gain exposure to the price of Solana (SOL), the coin used on the Solana blockchain.

Investing in Solana via an exchange-traded product allows investors to utilise the best of traditional financial infrastructure and product structuring. The ETP allows investors to access Solana without the need to hold the crypto assets directly, store private access keys or interact with the blockchain and crypto infrastructure in any way.

Solana: A Decentralised Application Platform

Solana is a layer-1 smart contract platform for decentralised applications featuring high throughput and low transaction costs. The project originated in 2017 when founder Yakovenko proposed a whitepaper draft with a new timekeeping technique for distributed systems called Proof of History, which underpins the Solana network today. Then later in 2018, the project was founded by Alan Yu, Anatoly Yakovenko, Greg Fitzgerald, Raj Gokal, and Stephen Akridge.

The Solana network is designed for high transaction throughput. It offers a relatively fast transaction speed (a few hundred milliseconds¹ vs 10 seconds for Ethereum vs 10 minutes for Bitcoin) and more transactions per second (710,000 trs/sec² vs 24,000 trs/sec³ for Visa) at a relatively low cost. In its early stages, the Solana ecosystem hosts over 500 projects on 14 categories⁴ including banking and payments, data and analytics, wallet and browser, gaming and non-fungible tokens (NFTs), decentralized finance (DeFi), and infrastructure, etc., among which over 50% are in the NFTs/Gaming and DeFi categories.

Why Invest in Solana?

Solana's scalability: The main differentiating factor for Solana is its high transaction throughput. This makes it potentially more scalable than other smart contract networks. New use cases, taking advantage of this high transaction throughput, could emerge in

4 <https://solana.com/ecosystem>

areas such as gaming. This increased, unique demand to use the Solana network should drive the price of the SOL cryptocurrency.

Solana eco-system: Solana network’s native cryptocurrency, SOL, is used to execute custom programs, send transactions, and incentivize actors that support the Solana network. An eco-system of distributed applications (dApps) has emerged using this functionality. One must possess SOL in order to use these dApps. This increased demand to use the Solana network should drive the price of the SOL cryptocurrency.

Additional staking yield: It is possible to earn a yield from staking Solana. This is because the Solana network uses a proof of stake consensus mechanism, which helps ensure the security of the network’s distributed ledger (‘blockchain’).

Staking on Solana

The Solana network uses a proof of stake consensus mechanism. This means that one can delegate (i.e. ‘stake’) SOL cryptocurrency to one of the validator nodes that run the network. A node is a computer that runs the Solana software. This node then validates new entries to Solana’s distributed ledger (‘blockchain’). In return for helping to update and secure the ledger, validator nodes are probabilistically allocated new SOL cryptocurrency (the ‘staking reward’). The higher the staked amount of SOL cryptocurrency the higher the probability of receiving this reward. The staking reward can vary over time depending on a number of factors including the digital asset network’s inflation rate and the performance of the validator node.

Key information – Solana staking

Staking reward (APY)	4-8% on average ⁵
SOL inflation rate*	7% annually ⁶
Reward frequency	Approximately 2 days
Unbonding time**	2-4 days
Custodian	Coinbase (using Bison Trails)
Slashing***	No automatic slashing

Notes: * The % of new SOL added to the supply each year

** Unbonding is the time taken to unlock the staked cryptocurrency from the smart contract with a validator node.

*** The penalty imposed on malicious nodes that attempt to approve false entries on the distributed ledger

Solana in an ETP with WisdomTree

Investors look to the ETP structure to provide additional protection for their investments:

SECURITY – Safely storing digital assets is not only about protecting against hacks, but also protecting against the inadvertent loss of private keys. Investing in digital assets through an ETP structure could allow investors to transfer the expensive and time-consuming burden of managing private keys to the issuer and to benefit from institutional-grade safeguarding of assets in cold storage⁷.

TRANSPARENCY – Transparency is a core component of the ETP structure. A digital assets ETP could offer a core measure of confidence for investors by enabling access to an audited website from the issuer, showing exactly how many coins are represented by the outstanding fund shares. This is already standard practice in physical gold ETP structures and provides an incomparable measure of transparency for investors.

ETP STANDARDISATION – Product standardisation is an aspect of the ETP wrapper that could benefit investors in digital assets. Trading, holding and accounting for investments in ETPs are well established and the provision of crypto exposure in this format could allow such investments to fit within an investor's existing systems, processes and risk management. Additionally, providing crypto exposure in an ETP could deliver benefits from standard market features that many investors rely on. Centralised clearing, an exchange listing on a recognised venue and standard settlement practices all lower the operational and counterparty risk of making investments.

LIQUIDITY – ETPs tend to bring a centralisation of liquidity to asset classes. This could be especially impactful in the crypto space as the current ecosystem is quite fragmented, with trading happening across many venues with no common settlement infrastructure. An investor would need to separately establish connectivity to several venues in order to access their liquidity. Investment in an ETP essentially outsources this responsibility to specialist market makers, with trading infrastructure to manage many exchange connections.

Digital assets exposures by WisdomTree

WisdomTree looks to address the needs of investors within the digital assets landscape by delivering exposures to unique digital assets. WisdomTree's Solana ETP taps into WisdomTree's tradition of innovation and leverages the firm's deep expertise in physically-backed ETPs.

WisdomTree offers a wide variety of resources on the [WisdomTree's Crypto Insight Centre](#).

⁷ Cold storage refers to the offline storage of private keys.

Important Information

Marketing communications issued in the European Economic Area (“EEA”): This document has been issued and approved by WisdomTree Ireland Limited, which is authorised and regulated by the Central Bank of Ireland.

Marketing communications issued in jurisdictions outside of the EEA: This document has been issued and approved by WisdomTree UK Limited, which is authorised and regulated by the United Kingdom Financial Conduct Authority.

WisdomTree Ireland Limited and WisdomTree UK Limited are each referred to as “WisdomTree” (as applicable). Our Conflicts of Interest Policy and Inventory are available on request.

This marketing communication has been prepared for professional investors, but the WisdomTree products set out in this document may be available in some jurisdictions to any investors, subject to applicable laws and regulations. As the product may not be authorised or its offering may be restricted in your jurisdiction, it is the responsibility of every person or entity to satisfy themselves as to the full observance of the laws and regulations of the relevant jurisdiction. Prior to any application investors are advised to take all necessary legal, regulatory, tax and investment advice on the suitability and consequences of an investment in the products. Past performance is not a reliable indicator of future performance. Any historical performance included in this document may be based on back testing. Back testing is the process of evaluating an investment strategy by applying it to historical data to simulate what the performance of such strategy would have been. Back tested performance is purely hypothetical and is provided in this document solely for informational purposes. Back tested data does not represent actual performance and should not be interpreted as an indication of actual or future performance. The value of any investment may be affected by exchange rate movements. Any decision to invest should be based on the information contained in the appropriate prospectus and after seeking independent investment, tax and legal advice. These products may not be available in your market or suitable for you. The content of this document does not constitute investment advice nor an offer for sale nor a solicitation of an offer to buy any product or make any investment.

An investment in exchange-traded products (“ETPs”) is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs involve numerous risks including among others, general market risks relating to the relevant underlying index, credit risks on the provider of index swaps utilised in the ETP, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.

The information contained in this document is not, and under no circumstances is to be construed as, an advertisement or any other step in furtherance of a public offering of shares in the United States or any province or territory thereof, where none of the issuers or their products are authorised or registered for distribution and where no prospectus of any of the issuers has been filed with any securities commission or regulatory authority. No document or information

in this document should be taken, transmitted or distributed (directly or indirectly) into the United States. None of the issuers, nor any securities issued by them, have been or will be registered under the United States Securities Act of 1933 or the Investment Company Act of 1940 or qualified under any applicable state securities statutes.

This document may contain independent market commentary prepared by WisdomTree based on publicly available information. Although WisdomTree endeavours to ensure the accuracy of the content in this document, WisdomTree does not warrant or guarantee its accuracy or correctness. Any third party data providers used to source the information in this document make no warranties or representation of any kind relating to such data. Where WisdomTree has expressed its own opinions related to product or market activity, these views may change. Neither WisdomTree, nor any affiliate, nor any of their respective officers, directors, partners, or employees accepts any liability whatsoever for any direct or consequential loss arising from any use of this document or its contents.

This document may contain forward looking statements including statements regarding our belief or current expectations with regards to the performance of certain assets classes and/or sectors. Forward looking statements are subject to certain risks, uncertainties and assumptions. There can be no assurance that such statements will be accurate and actual results could differ materially from those anticipated in such statements. WisdomTree strongly recommends that you do not place undue reliance on these forward-looking statements.

The products discussed in this document are issued by WisdomTree Issuer X Limited (the “Issuer”). Investors should read the prospectus of the Issuer before investing and should refer to the section of the prospectus entitled “Risk Factors” for further details of risks associated with an investment in the securities offered by the Issuer.

Securities issued by the Issuer are direct, limited recourse obligations of the Issuer alone and are not obligations of or guaranteed by any of Swissquote Bank Ltd (“Swissquote”), Coinbase Custody Trust Company LLC (“Coinbase”), any of their affiliates or anyone else or any of their affiliates. Each of Swissquote and Coinbase disclaims all and any liability whether arising in tort, contract or otherwise which it might have in respect of this document or its contents otherwise arising in connection herewith.

The product discussed in this document is an unregulated ETP, approved to trade on the SIX Swiss Exchange in Switzerland, Euronext Paris, Euronext Amsterdam and the Deutsche Börse Xetra in Germany. Cryptocurrencies are a high-risk investment and may not be suitable for all types of investor. Prospective investors should be aware that the price of the underlying asset(s) by which the securities are secured can demonstrate higher volatility than other asset classes and consequently the value of the securities may be extremely volatile. You must ensure that the nature, complexity and risks associated with cryptocurrencies are suitable for your objectives in light of your circumstances and financial position.

The digital assets underlying WisdomTree’s exchange traded products are held using secure,

institutional-grade custody solutions that prevent unauthorised access or movement. Digital assets are primarily stored offline in cold wallets and their transfer requires authorisation from multiple independent parties with a redundancy of locations, communication methods and authentication devices.

Our operational processes are regularly updated to protect against evolving threats and are kept confidential for security reasons.
