WisdomTree Physical Stellar Lumens

The WisdomTree Physical Stellar Lumens ETP (exchange-traded product) provides investors with a simple, secure, and cost-efficient way to gain exposure to the price of Lumens (XLM), the native token of the Stellar blockchain.

Investing in Lumens via an ETP allows investors to utilise the best of traditional financial infrastructure and product structuring. The ETP allows investors to access Lumens without the need to hold the crypto assets directly, store private access keys, or interact with the blockchain and crypto infrastructure in any way.

Stellar: Layer-1 blockchain

Stellar is a high-performance Layer-1 blockchain purpose-built to modernise global finance. It enables fast, ultra-low-cost payments, and tokenised asset issuance. Since its launch in 2014, Stellar has evolved into a globally distributed network powering mission-critical use cases, including cross-border payments, remittances, and tokenised real-world assets (RWAs).

Core features driving Stellar's utility and adoption:

- + **Stellar Consensus Protocol (SCP):** a uniquely collaborative consensus mechanism built on federated voting by publicly identifiable validators. SCP eliminates the need for monetary validator incentives, delivering near-instant finality with low environmental impact.
- + **Soroban smart contracts:** introduced in 2024, Soroban brings expressive decentralised finance (DeFi) and decentralised application (dApp) capabilities to Stellar without compromising its streamlined, payments-first architecture.
- + **Anchors and on/off ramps:** Stellar integrates with 69+ regulated financial institutions ('anchors') across 170+ countries, supporting seamless access to over 170+ fiat currencies. This global fiat-crypto bridging infrastructure is unmatched in scope and compliance readiness¹.

Lumens (XLM), Stellar's native asset, is the lifeblood of the network—powering transactions, liquidity, and on-chain finance:

- + **Micro-transaction friendly:** XLM transaction fees average just \$0.00015, making high-volume or micro-scale payments economically viable.
- + **Bridge asset for foreign exchange and remittances:** XLM serves as a neutral intermediary in Path Payments², facilitating efficient cross-currency transactions without relying on costly, slow legacy rails.
- + **Liquidity backbone for decentralised finance (DeFi):** XLM provides liquidity across Stellar's native automated market makers (AMMs) and the Stellar Decentralised Exchange (SDEX), enabling low-slippage swaps and capital-efficient routing.

These innovations, while encouraging, continue to evolve within a shifting global regulatory landscape, underscoring the importance of monitoring developments in the space.

Why invest in Lumens (XLM)?

- + **Focused utility in cross-border payments:** Stellar is purpose-built for fast, low-cost cross-border transactions, with XLM playing a central role as a bridge asset between currencies. In a global economy where remittances and real-time foreign exchange (FX) settlements are growing in importance, XLM benefits directly from increased network usage.

1 Source: Messari. 30 June 2025.

2 Path Payments refer to a transaction feature on the Stellar network that allows users to send one type of asset while enabling the recipient to receive a different asset. The Stellar protocol automatically routes the payment through available asset exchange offers on its decentralised exchange (SDEX), selecting the most efficient conversion path. This is executed atomically within a single transaction, ensuring either full completion or full rollback.

- + **Supply management and inflation resistance:** unlike many tokens with unclear monetary policies, XLM has a fixed total supply of 50 billion and no inflationary issuance³, making it more attractive from a scarcity and monetary integrity perspective.
- + **Robust ecosystem support via the Stellar Development Foundation (SDF):** the SDF supports developers and infrastructure growth through grants, technical tooling, partnerships and regulatory engagement. It is a transparent, non-profit entity committed to long-term network adoption. SDF's efforts aid network resilience and reduce operational risk, helping the network's continued evolution.

Lumens in an ETP with WisdomTree

Investors look to the ETP structure to provide additional protection for their investments:

- + **Security:** safely storing digital assets is not only about protecting against hacks but also protecting against the inadvertent loss of private keys. Investing in digital assets through an ETP structure could allow investors to transfer the expensive and time-consuming burden of managing private keys to the issuer and to benefit from institutional grade safeguarding of assets in cold storage.
- + **Transparency:** transparency is a core component of the ETP structure. A digital assets ETP could offer a core measure of confidence for investors by enabling access to an audited website from the issuer, showing exactly how many coins are represented by the outstanding fund shares. This is already standard practice in physical gold ETP structures and provides an incomparable measure of transparency for investors.
- + **ETP standardisation:** product standardisation is an aspect of the ETP wrapper that could benefit investors in digital assets. Trading, holding and accounting for investments in ETPs are well established and the provision of crypto exposure in this format could allow such investments to fit within an investor's existing systems, processes, and risk management. Additionally, providing crypto exposure in an ETP could deliver benefits from standard market features that many investors rely on. Centralised clearing, an exchange listing on a recognised venue, and standard settlement practices all lower the operational and counterparty risk of making investments.
- + **Liquidity:** ETPs tend to bring a centralisation of liquidity to asset classes. This could be especially impactful in the crypto space as the current ecosystem is quite fragmented, with trading happening across many venues with no common settlement infrastructure. An investor would need to separately establish connectivity to several venues in order to access their liquidity. Investment in an ETP essentially outsources this responsibility to specialist market makers, with trading infrastructure to manage many exchange connections.

³ Historically, Stellar featured a 1% annual inflation mechanism, which was removed via a network upgrade in October 2019 following a community vote. Around the same time, the SDF conducted a strategic burn of 55 billion XLM—over half the existing supply—reducing the total to 50 billion tokens and reinforcing a fixed-supply model.

Why WisdomTree Physical Stellar Lumens?

- + **100% physically backed by Lumens:** exposure to the spot price of Lumens through an institutional grade, physically backed structure. The corresponding digital assets are securely stored in professional ‘cold storage’⁴.
- + **Institutional grade custody:** investors benefit from institutional grade cryptocurrency custody solutions, via a dual-custodian model with regulated custodians (Coinbase and Swissquote).
- + **Low cost:** with a management fee of just 0.50%, this is the lowest cost physically backed Lumens ETP in Europe.

WisdomTree offers a wide variety of resources on our [Crypto ETP Centre](#).

As with all investments, particularly those involving emerging technologies, cryptocurrencies, and evolving regulatory frameworks, investors should assess both the potential rewards and the associated risks. Cryptocurrencies have historically exhibited high levels of price volatility, driven by market sentiment, regulatory developments, and evolving use cases.

⁴ Cold storage refers to holding private keys in an offline environment, not directly connected to the internet.

Important Information

Marketing communications issued in the European Economic Area (“EEA”): This document has been issued and approved by WisdomTree Ireland Limited, which is authorised and regulated by the Central Bank of Ireland.

Marketing communications issued in jurisdictions outside of the EEA: This document has been issued and approved by WisdomTree UK Limited, which is authorised and regulated by the United Kingdom Financial Conduct Authority.

WisdomTree Ireland Limited and WisdomTree UK Limited are each referred to as “WisdomTree” (as applicable). Our Conflicts of Interest Policy and Inventory are available on request.

This marketing communication has been prepared for professional investors, but the WisdomTree products set out in this document may be available in some jurisdictions to any investors, subject to applicable laws and regulations. As the product may not be authorised or its offering may be restricted in your jurisdiction, it is the responsibility of every person or entity to satisfy themselves as to the full observance of the laws and regulations of the relevant jurisdiction. Prior to any application investors are advised to take all necessary legal, regulatory, tax and investment advice on the suitability and consequences of an investment in the products. Past performance is not a reliable indicator of future performance. Any historical performance included in this document may be based on back testing. Back testing is the process of evaluating an investment strategy by applying it to historical data to simulate what the performance of such strategy would have been. Back tested performance is purely hypothetical and is provided in this document solely for informational purposes. Back tested data does not represent actual performance and should not be interpreted as an indication of actual or future performance. The value of any investment may be affected by exchange rate movements. Any decision to invest should be based on the information contained in the appropriate prospectus and after seeking independent investment, tax and legal advice. These products may not be available in your market or suitable for you. The content of this document does not constitute investment advice nor an offer for sale nor a solicitation of an offer to buy any product or make any investment.

An investment in exchange-traded products (“ETPs”) is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs involve numerous risks including among others, general market risks relating to the relevant underlying index, credit risks on the provider of index swaps utilised in the ETP, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.

The information contained in this document is not, and under no circumstances is to be construed as, an advertisement or any other step in furtherance of a public offering of shares in the United States or any province or territory thereof, where none of the issuers or their products are authorised or registered for distribution and where no prospectus of any of the issuers has

been filed with any securities commission or regulatory authority. No document or information in this document should be taken, transmitted or distributed (directly or indirectly) into the United States. None of the issuers, nor any securities issued by them, have been or will be registered under the United States Securities Act of 1933 or the Investment Company Act of 1940 or qualified under any applicable state securities statutes.

This document may contain independent market commentary prepared by WisdomTree based on publicly available information. This document may contain forward looking statements including statements regarding our belief or current expectations with regards to the performance of certain assets classes and/or sectors. Forward looking statements are subject to certain risks, uncertainties and assumptions. There can be no assurance that such statements will be accurate and actual results could differ materially from those anticipated in such statements. WisdomTree strongly recommends that you do not place undue reliance on these forward-looking statements.

WisdomTree Issuer X Limited

The products discussed in this document are issued by WisdomTree Issuer X Limited (the “Issuer”). Investors should read the prospectus of the Issuer before investing and should refer to the section of the prospectus entitled “Risk Factors” for further details of risks associated with an investment in the securities offered by the Issuer.

Securities issued by the Issuer are direct, limited recourse obligations of the Issuer alone and are not obligations of or guaranteed by any of Swissquote Bank Ltd (“Swissquote”), Coinbase Custody Trust Company LLC (“Coinbase”), any of their affiliates or anyone else or any of their affiliates. Each of Swissquote and Coinbase disclaims all and any liability whether arising in tort, contract or otherwise which it might have in respect of this document or its contents otherwise arising in connection herewith.

The product discussed in this document is an unregulated ETP, approved to trade on the London Stock Exchange, SIX Swiss Exchange in Switzerland, Euronext Paris, Euronext Amsterdam and the Deutsche Börse Xetra in Germany. Cryptocurrencies are a high-risk investment and may not be suitable for all types of investor. Prospective investors should be aware that the price of the underlying asset(s) by which the securities are secured can demonstrate higher volatility than other asset classes and consequently the value of the securities may be extremely volatile. You must ensure that the nature, complexity and

risks associated with cryptocurrencies are suitable for your objectives in light of your circumstances and financial position.

Don't invest unless you're prepared to lose all the money you invest. This is a high-risk investment and you should not expect to be protected if something goes wrong.
